Connecting the world:
One transformed, inspired,
effective, specialist at a time!

GROUP ENERGY AND SERVICE CAPACITY EVALUATOR

Instructions:

Please take a few moments to think about some of the conditions present today in your workgroup.

On the other side of this form is an evaluator that will help you to rank some of the capacity levels you believe exist in your workplace. Much like our automobile, it's good to pay attention to the level of "gas in our tanks". The gauge below indicates what each level signifies. For each statement of the evaluator, place a tick mark in the box that best matches your group's level. Be sure to note your totals.

This evaluator is just for you. We don't need to see it for the purposes of our meeting. We are only interested that you get a quick idea of the different areas that may be signaling decreases or increases in your group's energy and service capacity.

Empty	=	There's no where to go but up!
¼ full	=	We really need to improve!
½ full	=	We're getting by...
¾ full	=	We want to move from good to great!
Full	=	Couldn't be better!
